DataSmart Compact 14" for HP OJ 100

Compact attaché case for 10" to 14" notebook and HP OJ 100 printer.

Thanks to the 'sandwich' design – the printer is located directly beneath the notebook platform – the case has a very compact shape. Thus, the notebook and printer remain firmly wired into the case, ready to work on. The paper guide is space-saving and crease-resistant beneath the notebook platform, the paper is ejected from the side when the notebook platform is folded closed.

The notebook is fastened with plastic holders. Thanks to the individual size adjustment via the holding pins the extra large removable notebook platform offers space for from 10" to 14" notebook. Two different socket boxes (2 x Euro 8, 2 x Euro 8 with earth conductor – IBM/Compaq cable) allow the connection of notebooks by differing manufacturers. The HP OJ 100 printer fits precisely in the bottom of the case. The notebook and printer mains adapters are connected to the case outer shell via the 220V low heat device connector. The connection between the printer and notebook can either be created via Bluetooth (if supported) or with a USB cable. Due to the compact design, an angled USB cable (not included) can be required. Documents can be securely transported in the document pocket in the case lid. The case lid is detachable. *All the devices pictured (such as notebook, printer etc.) are not included!
